MTC 3210/3207

◌ 智能型温度控制器，集成式微电子控制技术
◌ 触摸式大屏人机对话操作模式
◌ 集成时序控制器，通用工业网络数据接口

◌ Intelligent temperature controller adopts the PID control system
◌ It applies the interaction operating mode with the touch screen
◌ Embodies the integrated sequential control and the connection for the general data input or output

TCU-1310

◌ 插卡式温度控制器
◌ 不同工作环境多模式可选
◌ 控温精确度达±0.01度
◌ 错误报警自动存储功能
◌ 开机软启动除湿功能,保护加热器使用寿命

◌ Independent control unit temperature controller
◌ The multi-mode option for the different working environment
◌ The precision temperature control is up to ± 0.01°C
◌ Alarms and automatic storage function are available
◌ The soft-start and dehumidification function extends the life of heater

T-TIMER

- 多模式时间控制器
- 参数设置自动存储功能
- 电磁输出电压（AC220V\DC24V）可选
- 手动开启功能
- 时间控制精确度达0.01S
- 操作简便

- Simultaneous control timer on the multi-gates
- The parameter setting data can be automatic saved
- The optional output voltage for both AC220V & DC24V
- The manual operation function is available
- The precise time control is up to 0.01S
- Simple operation to change data and setting the time
